ayooluwababalola24@gmail.com

Summary

- Dynamic and proficient developer with a robust mathematical background and over two years of hands-on experience in creating and maintaining responsive web applications. Expert in utilizing cutting-edge technologies such as React.js, Vue.js, Tailwind CSS, and Node.js to build user-friendly and efficient front-end solutions. Demonstrated ability to lead development projects from conception to completion, optimizing for performance and SEO. Adept at collaborating with cross-functional teams to deliver high-quality software solutions. Proven track record of enhancing user engagement and improving SEO rankings through innovative design and development strategies

Skills

HTML5, CSS3, JavaScript, Vuejs, Reactjs, Nextjs, Nuxtjs, Tailwindcss

Education

Landmark University
Bsc.Computer Science | 11/2024

Experience

Dexterpro Limited | Lagos, Lekki
Front End Developer | 03/2023 - 10/2023

- Led the development of the Dexter app landing page, translating Figma designs into a functional and responsive web experience using Vue.js, CSS, and Vite. Optimized for search engines (SEO) and implemented backend functionalities using Node.js, MongoDB, Express, and Mailgun for features like contact forms and newsletters.
- Revamped the company's landing page, resulting in a 20% improvement in SEO ranking (tracked via Google Search Console) and a 15% reduction in bounce rate, creating a more user-friendly and engaging experience for visitors.
- Designed and developed a high-converting landing page for a client using React.js. Prioritized SEO best practices throughout the development process and implemented responsive web design to ensure a seamless user experience across all devices.
- Developed a comprehensive staff portal using React and Tailwind CSS for improved internal communication and resource management. Implemented functionalities such as secure user login, document sharing, and task management.
- Led the redesign and relaunch of the Dexter app landing page using Nuxt.js, capitalizing on its SEO and Server-Side Rendering (SSR) advantages for improved search engine visibility. Incorporated smooth animations with GreenSock and maintained clean styling with Tailwind CSS, delivering a modern and engaging user experience.

Projects

Advice App

- Developed a responsive web application using Vue.js and CSS.
- Integrated Axios to fetch data from the advice API, providing users with random advice at the click of a button.
- [LIVE DEMO](#)

Global And Hemispheric Mean Chart

- Utilized the Fetch API to retrieve global and hemispheric temperature data from NASA.
- Created a custom chart using Chart.js to display temperature mean growth since 1880.
- [LIVE DEMO](#)

International Space Station Tracker

- Implemented the Fetch API to obtain real-time location data of the ISS from NASA's API.
- Leveraged Leaflet.js to create a dynamic map showing the real-time location of the ISS and the user's current location
- Displayed real-time longitude and latitude of both the ISS and the user.
- [LIVE DEMO](#)

Huddle Landing Page

- Designed and developed a simple, yet effective landing page using HTML and CSS.
- Focused on clean, responsive design to ensure accessibility across all devices.
- [LIVE DEMO](#)

Akatech Energy

- Designed and developed a simple, yet effective landing page using Reactjs, CSS and Gsap.
- Focused on clean, responsive design to ensure accessibility across all devices.
- [LIVE DEMO](#)
